Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

In this case, the specification is objected because it is not in the formal layout format. It is suggested that the applicant should follow the above guidelines to illustrate the layout for the specification of this application.

Claim Objections

2. Claim 1 is objected to because of the following informalities: the term "aninverter" recited in line 7, has a typo error and should be changed to "an inverter". Also, the term "the resonant circuit" recited in lines 6, has no antecedent basis in the claim. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Maehara et al (US 5,091,617) in view of Nilssen et al (US 4,956,581) both cited by applicant. Maehara discloses a high frequency heating apparatus comprising a magnetron (19, Figure 1) generating microwave energy; a filament circuit (14 and 20, Figure 1); an inverter which ensures that the magnetron is powered by high-frequency rectified voltage via the energy obtained from the network (5 and 4, Figure 1) and which incorporates a wave multiplexer (15-18, Figure 1) whereby the voltage obtained from the high frequency current coming from the resonant circuit is multiplied by being raised and rectified (col. 1, lines 25-52). However, Maehara does not disclose a low-pass filter place between the multiplexer and the ground. Nilssen discloses a low-pass filter connecting with the ground. It would have been obvious to one ordinary skill in the art

Art Unit: 3742

at the time the invention was made to utilize in Maehara a low-pass filter connecting with the ground in order to reduce noise from the feeding circuit.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Inumada (US 4,724,291) discloses a variable output microwave oven.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T. Van whose telephone number is 571-272-4789. The examiner can normally be reached on 8:00Am 5:00Pm M-F.
